

- *Height* – sets a height for the selected object.
- *Keep ratio* – maintains proportions between width and height when resizing the chart.
- *Base point* – determines the directions in which the chart size will be increased or decreased.

Protect

Prevents unintended changes to the position or the size of the chart.

- *Position* – prevents unintentionally moving the chart.
- *Size* – prevents unintentionally resizing the chart.

Adapt

Specifies if the size should be adjusted to fit the size of entered text. Availability of these options depends on the context.

- *Fit width to text* – expands the width of the object to the width of the text, if the object is smaller than the text.
- *Fit height to text* – expands the height of the object to the height of the text, if the object is smaller than the text.

Rotation

The options for the *Rotation* tab (Figure 125) are as follows:

Pivot Point

The chart can be rotated around a pivot point. The default pivot point is at the center of the chart. Note that if there is not enough room to rotate the chart, it could be rotated off of the page.

- *Position X* – specifies the horizontal distance from the left edge of the page to the pivot point.
