

| | A | B | C | D | E |
|---|---|----|----|----------------|---|
| 1 | 3 | 24 | 27 | Record Macro | |
| 2 | 6 | 21 | 30 | | |
| 3 | 9 | 18 | 33 | Stop Recording | |
| 4 | | | | | |

Figure 428: Cells A1:C3 multiplied by 3

- 8) Click the **Stop Recording** button to stop the macro recorder. Calc displays a variant of the Basic Macros dialog (Figure 429).

✓ Note

The *Save Macro In* area of the Basic Macros dialog shows the existing LibreOffice Basic macros, hierarchically structured into library containers, libraries, modules, and macros as described in Chapter 13 of the *Getting Started Guide*. Figure 429 shows the *My Macros* library container, the *LibreOffice Macros* library container, the library container for the open *balance.ods* file, and the library container for the untitled file created at step 1. Use the expand / collapse icons to the left of each library container name to view the libraries, modules and macros within that container.
