

Figure 384: External Data dialog

- a) Click **OK** on the Import Options dialog. Calc loads the list of available tables/ranges into the *Available Tables/Ranges* area of the External Data dialog. The Web Page Query import filter can create names for cell ranges as they are imported. As much formatting as possible is retained while the filter intentionally does not import any images. The filter additionally creates two additional entries in the list: *HTML_all* to permit selection of the entire document and *HTML_tables* to permit selection of all the tables.
- b) In the *Available Tables/Ranges* area, select the named ranges or tables you want to insert (hold *Ctrl* to select multiple entries). The **OK** button then becomes available.

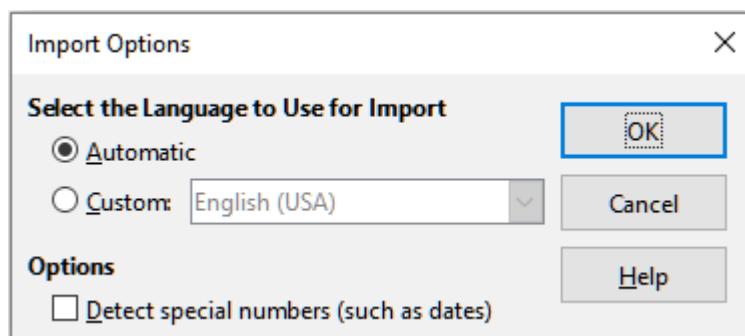

Figure 385: Import Options dialog

- 6) If you selected a CSV file as the data source at step 4, Calc displays the Text Import dialog (Figure 386). This dialog is described in detail in Chapter 1, Introduction. Click **OK** on the Text Import dialog and select *CSV_all* in the *Available Tables/Ranges* area of the External Data dialog. The **OK** button then becomes available.
- 7) If you selected a Calc or Microsoft Excel file as the data source at step 4, Calc populates the *Available Tables/Ranges* area of the External Data dialog with the list of range names and database ranges that are defined in the source file. Select the range names and database ranges that you want to insert (hold *Ctrl* to select multiple entries) and the **OK** button then becomes available.
