

Figure 102: Axis label positions

Line tab

The *Line* tab has options for formatting the axis line style, color, width, and transparency. It has the same contents as the *Line* tab of the Data Series dialog shown in Figure 93 on page 124 but excluding the *Icon* section.

Label tab

On the *Label* tab (Figure 103), choose whether to show or hide the labels and specify how to handle them when they do not fit neatly in the chart. The options are described below.
