

To disable an extension without removing (uninstalling) it, select the extension in the main window of the Extension Manager dialog and click the **Disable** button, which then changes to **Enable**.

✓ Note

In some cases, the **Remove** and **Disable** buttons may be unavailable – this will be the case when you have selected one of the extensions that was bundled with your LibreOffice installation.

Adding custom colors

The method for defining a custom color is as follows:

- 1) Insert any drawing object, such as a square, into any document.
- 2) Right-click on the object and choose **Area** in the context menu.
- 3) Go to the *Color* tab (Figure 504). From the *Palette* drop-down in the *Colors* area, choose which palette you wish to add the new color to. Under *New*, define the new color using RGB or Hex notation, or click the **Pick** button to select the color on the Pick a Color dialog (Figure 505).
