

Figure 104: Axis formatting dialog – Numbers tab

### Font and Font effects

Use the *Font* and *Font Effects* tabs to set the font and font effects for the axis labels. These tabs are the same as the tabs for specifying fonts and font effects in cells. See Chapter 2, *Entering, Editing, and Formatting Data* for more information.

### Asian Typography

Sets the Asian typographic options for axis labels. This tab is the same as that for specifying Asian typographic options for cells. See Chapter 2, *Entering, Editing, and Formatting Data* for more information.

### Hierarchical axis labels

Multiple levels of categories can be displayed in a hierarchical manner along the axis of a chart. Hierarchical axes labels are created automatically if the first column or row defined as data is text (as opposed to the first column or row defined as labels). An example of hierarchical labels is shown in Figure 105. In this case, Calc automatically defines the data range for categories as the first two columns in the spreadsheet. This is reflected in the chart, which shows the hierarchical relationship between quarters and months.
