

Character set

Select the appropriate character set for the export.

The screenshot shows the 'Font Sizes' and 'Import/Export' sections of the LibreOffice Options dialog. The 'Font Sizes' section has seven rows, each with a label (Size 1: to Size 7:) and a spin box. The values are 7, 10, 12, 14, 18, 24, and 36 respectively. The 'Import' section has three checkboxes: 'Use 'English (USA)' locale for numbers' (unchecked), 'Import unknown HTML tags as fields' (unchecked), and 'Ignore font settings' (unchecked). The 'Export' section has three checkboxes: 'LibreOffice Basic' (unchecked), 'Display warning' (checked), and 'Print layout' (unchecked). Below these is a 'Character set:' label followed by a dropdown menu showing 'Unicode (UTF-8)'.

Calc-specific options

Calc must be open in order for the LibreOffice Calc options to be displayed in the Options dialog. Click the expansion symbol (+ or triangle) by *LibreOffice Calc*. A list of subsections drops down (Figure 482).

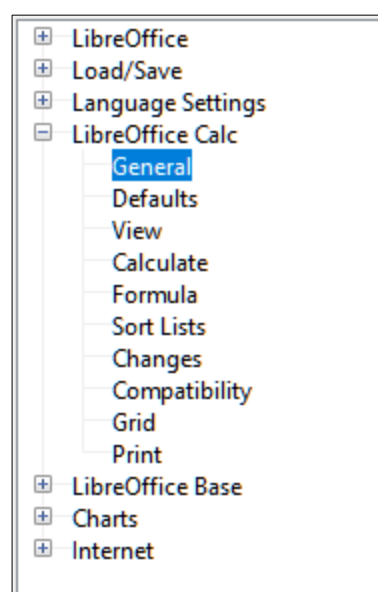

Figure 481: Calc options

General

The choices on the *LibreOffice Calc – General* page (Figure 482) affect the units used for rulers and other measurements, the default tab stop positions, the updating of links and fields, and various input settings.

Metrics

Choose the unit of measurement used in spreadsheets and the default tab stops distance.
