

Figure 124: Position and Size dialog — Position and Size tab

Click one of the points in the *Base point* graphic corresponding to the location to use for anchoring either the position of the chart or its size.

Note that either the position or the size can be protected from unwanted changes by clicking the appropriate box in the *Protect* section. Either or both option(s) selected will remain active after the dialog is closed. By contrast, Calc resets the base point to the default position after the dialog is closed.

Position and Size

The options available on the *Position and Size* tab (Figure 124) are as follows:

Position

Determines the location of the chart on the page. The position of a chart is coordinated relative to a fixed point (the base point). By default, this base point is located at the upper left of a chart. To make positioning of a chart simpler, the base point can be temporarily changed.

- *Position X* – specifies the horizontal location of the chart relative to the base point.
- *Position Y* – specifies the vertical location of the chart relative to the base point.
- *Base point* – specifies a temporary base point for the chart.

Size

Specifies the amount by which to resize the selected chart with respect to the selected base point.

- *Width* – sets a width for the selected object.
