

Figure 73: Example chart automatically created using the Chart Wizard

## Selecting chart type

Calc offers a choice of ten basic chart types. Further options vary according to the type of chart selected. For more information about the different chart types see “Gallery of chart types” on page 162.

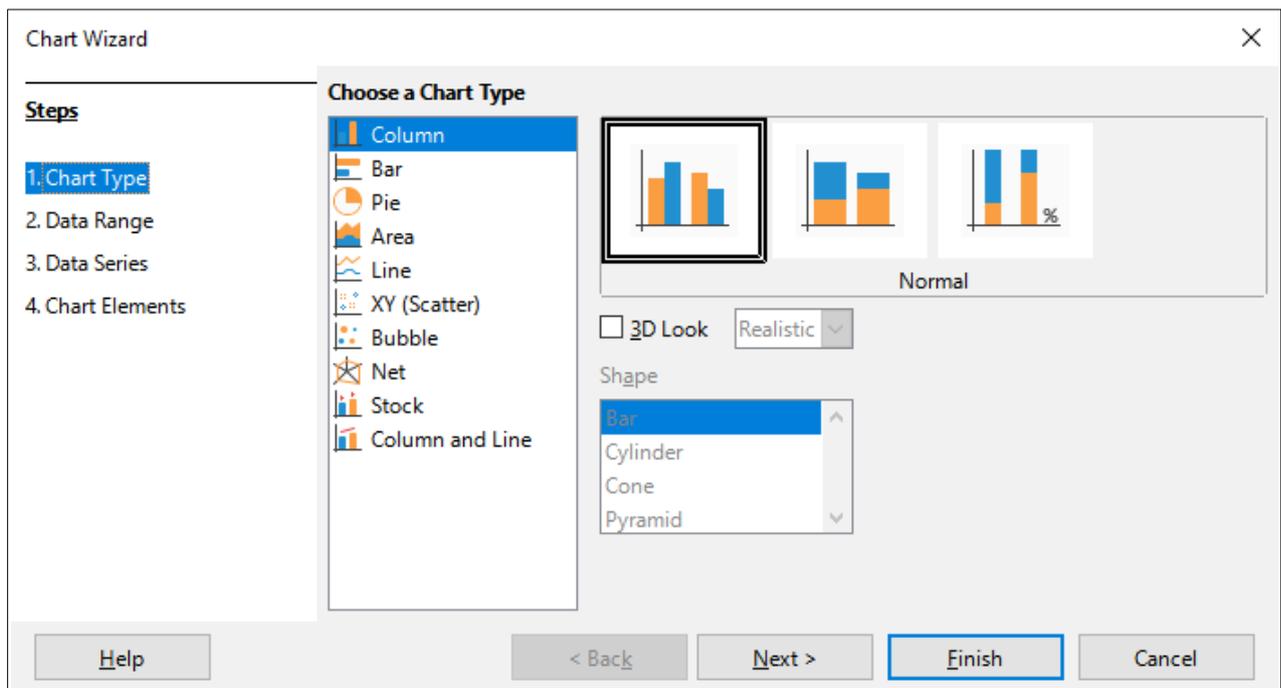

Figure 74: Chart Wizard dialog – selecting chart type

The initial chart created using the Chart Wizard is a 2D column chart. A small preview of the selected variant is highlighted with a surrounding border, as shown in Figure 74. The name of the variant (*Normal* in Figure 74) is shown below the preview.

To change chart types and options:

- 1) Select the type of chart from the list under *Choose a Chart Type*.
- 2) If needed, select a chart variant in the preview box by clicking on it. The options available depend on the type of chart selected. The chart changes instantly to reflect the selection.
