Table 40: Other shortcuts for menu and toolbar options

<b>macOS</b>	<b>Equivalent Menu bar / toolbar option</b>
Shift+Cmd+Pg Up	<b>Edit &gt; Select &gt; Select to Previous Sheet.</b> (In Calc 7.0, the menu option indicates an up arrow symbol rather than a page up symbol).
Shift+Cmd+Pg Dn	<b>Edit &gt; Select &gt; Select to Next Sheet.</b> (In Calc 7.0, the menu option indicates a down arrow symbol rather than a page down symbol).
Delete	<b>Sheet &gt; Clear Cells.</b>
Ctrl+Space	<b>Edit &gt; Select &gt; Select Column.</b>
Shift+Space	<b>Edit &gt; Select &gt; Select Row.</b>
Ctrl+Shift+Space Cmd+A	<b>Edit &gt; Select All.</b>
Cmd++	<b>Sheet &gt; Insert Cells</b> (use the + key on the numeric keypad).
Cmd+-	<b>Sheet &gt; Delete Cells.</b>
Cmd+*	<b>Edit &gt; Select &gt; Select Data Area.</b>
Cmd+;	<b>Insert &gt; Date.</b>
Shift+Cmd+;	<b>Tools &gt; Spelling.</b> <b>Spelling</b> icon on Standard toolbar.
Cmd+,	<b>LibreOffice &gt; Preferences.</b>

## Other Calc keyboard shortcuts

Tables 41 to 46 provide lists of additional Calc keyboard shortcuts that may be less obvious to users because they are not indicated on Menu bar items or in tooltips associated with icons on the Standard and Formatting toolbars.

Table 41: Other function key shortcuts

<b>macOS</b>	<b>Description</b>
Shift+F1	Display context sensitive help.
Cmd+F1	Display the comment attached to the current cell.
