<b>Total Result</b>	<b>291</b>	<b>304</b>	<b>268</b>

## Pivot Chart

Figure 295: Sample pivot chart and associated pivot table

## Creating a pivot chart

To create a pivot chart, click inside the pivot table and select **Insert > Chart** on the Menu bar or click the **Insert Chart** icon on the Standard toolbar.

Calc automatically detects the pivot table and opens the Chart Wizard. Through the Chart Wizard you can select the chart type and chart elements for the pivot chart. The wizard is similar to the corresponding wizard for normal charts but for pivot charts, the steps to define data range and data series are disabled.

The first step in the wizard is to select the chart type and the same options are available as for a normal chart (Figure 296).
