- **Text Orientation** – defines the text direction of cell contents.
  - *ABCD wheel* – click anywhere in the wheel to define the text orientation. The characters "ABCD" on the wheel correspond to the new setting.
  - *Vertically stacked* – assigns vertical text orientation for cell contents.
  - *Asian layout mode* – only available if Asian language support is enabled and the text direction is set to vertical. Aligns Asian characters one below the other in the selected cell(s). If the cell contains more than one line of text, the lines are converted to text columns that are arranged from right to left. Western characters in the converted text are rotated 90 degrees to the right. Asian characters are not rotated.
  - *Degrees* – allows you to manually enter the orientation angle.
  - *Reference edge* – specify the cell edge from which to write the rotated text:
    - *Text Extension From Lower Cell Border* – writes the rotated text from the bottom cell edge outwards.
    - *Text Extension From Upper Cell Border* – writes the rotated text from the top cell edge outwards.
    - *Text Extension Inside Cell* – writes the rotated text only within the cell.
- **Properties** – determine the text flow in a cell.
  - *Wrap text automatically* – wraps text onto another line at the cell border. The number of lines depends on the width of the cell. To enter a manual line break, press *Ctrl+Enter* in the cell.
  - *Hyphenation active* – enables word hyphenation for text wrapping to the next line.
  - *Shrink to fit cell size* – reduces the apparent size of the font so that the contents of the cell fit into the current cell width. You cannot apply this command to a cell that contains line breaks.
  - *Text direction* – choices are **Left-to-right**, **Right-to-left**, and **Use superordinate object settings** (the settings applied to the preceding cell).
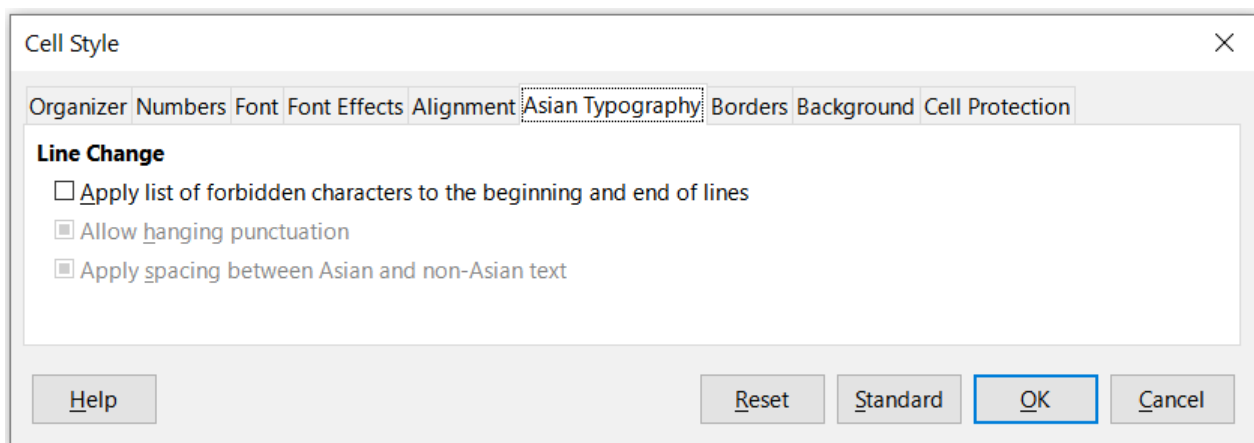

Asian Typography tab

Figure 166: Cell Style dialog - Asian Typography tab

If Asian language support is enabled, the *Asian Typography* tab is displayed on the Cell Style dialog. For more details of the options available on this tab, see the description of the corresponding tab of the Format Cell dialog in Chapter 2, Entering, Editing, and Formatting Data.
