To use a custom icon, create it in a graphics program and import it into LibreOffice by clicking the **Import** button on the Change Icon dialog. For best quality, custom icons should be 24 x 24 pixels in size; other sizes will be scaled automatically.

Select **Modify > Reset Icon** to revert to the option's default icon.

Notebook bar

By default, Calc's commands are grouped in cascading menus and in toolbars filled with icons. The notebook bar provides a different way to organize controls and icons, displaying contextual groups of commands and contents. You can find more information about the notebook bar in the Help system, by searching for "notebook bar" in the index.

One of the available notebook bar modes is *Tabbed* – in this mode, the bar is divided into tabs, where each tab displays a set of icons grouped by context. The context can also change depending on the object selected in the document, for example a table or an image.

Checkboxes are provided on the *Notebookbar* tab of the Customize dialog (Figure 501) to show and hide the individual options on the various tabs that are provided in the *Tabbed* mode user interface.

Use the **Reset** button to reset the *Tabbed* mode of the notebook bar configuration to the default settings.
