Export bookmarks as named destinations
If you have defined Calc sheet names, this option exports them as "named destinations" to which Web pages and PDF documents can link. Generally not used in Calc.

Convert document references to PDF targets
If you have defined links to other documents with OpenDocument extensions (such as .odt, .ods, and .odp), this option converts the file extensions to .pdf in the exported PDF document.

Export URLs relative to file system
If you have defined relative links in a document, this option exports those links to the PDF. See *Relative hyperlinks* in the Calc Help for more information.

Cross-document links
Defines the behavior of links clicked in PDF files. Select one among the following alternatives:

- **Default mode**: The PDF links will be handled as specified in your operating system.
