| Keyboard shortcut | Cell navigation |
|---|---|
| *Ctrl+→ / Ctrl+←* | If focus is on a blank cell, *Ctrl+→* moves focus along the current row to the first cell on the right that contains data. If there is no cell on the right containing data, it moves focus along the current row to the last cell at the right of the sheet. |
| | If focus is on a blank cell, *Ctrl+←* moves focus along the current row to the first cell on the left that contains data. If there is no cell on the left containing data, it moves focus along the current row to the cell in column A of the sheet. |
| | If focus is on a cell containing data, *Ctrl+→* normally moves focus along the current row to the cell at the right edge of the same data region. However, if there is a blank cell to the right of the original cell, focus is moved to the cell at the left edge of the next data region to the right. In this case, if there is no data region to the right, focus is moved along the current row to the last cell at the right of the sheet. |
| | If focus is on a cell containing data, *Ctrl+←* normally moves focus along the current row to the cell at the left edge of the same data region. However, if there is a blank cell to the left of the original cell, focus is moved to the cell at the right edge of the next data region to the left. In this case, if there is no data region to the left, focus is moved along the current row to the cell in column A of the sheet. |
| *Ctrl+↑ / Ctrl+↓* | If focus is on a blank cell, *Ctrl+↑* moves focus up the current column to the first cell that contains data. If there is no cell above containing data, it moves focus up the current column to the cell in row 1 of the sheet. |
| | If focus is on a blank cell, *Ctrl+↓* moves focus down the current column to the first cell that contains data. If there is no cell below containing data, it moves focus down the current column to the last cell at the bottom of the sheet. |
| | If focus is on a cell containing data, *Ctrl+↑* normally moves focus up the current column to the cell at the top edge of the same data region. However, if there is a blank cell above the original cell, focus is moved to the cell at the bottom edge of the next data region above. In this case, if there is no data region above, focus is moved up the current column to the cell in row 1 of the sheet. |
| | If focus is on a cell containing data, *Ctrl+↓* normally moves focus down the current column to the cell at the bottom edge of the same data region. However, if there is a blank cell below the original cell, focus is moved to the cell at the top edge of the next data region below. In this case, if there is no data region below, focus is moved down the current column to the bottom of the sheet. |
| *Ctrl+Home / Ctrl+End* | A detailed description of these shortcuts is given on Page 28. |
| *Alt+Page Down / Alt+Page Up* | Moves focus one screen to the right/left (if possible). |
| *Ctrl+Page Down / Ctrl+Page Up* | Moves focus to the next sheet to the right/left in sheet tabs if there are more sheets in that direction. |
| *Tab / Shift+Tab* | Moves focus to the next cell on the right/left. |
