- **Language** – sets the language that the spelling checker is to use. The spelling checker works only when you have installed the corresponding language module. A language entry has a check mark in front of it if the spelling checker is activated for that language.

- **Features** – some fonts offer special features such as Discretionary Ligatures and Horizontal Kerning. Click this button to access the Font Features dialog (not shown) to select those features.

- **Preview** – displays a preview of the current selection.

Font Effects tab

- **Font color** – sets the color for the text. If you select **Automatic**, the text color is set to black for light backgrounds and to white for dark backgrounds.

- **Transparency** – sets the transparency of the character text. The value 100% means entirely transparent, while 0% means not transparent at all.

- **Overlining** – select the overlining style that you want to apply. To apply the overlining to words only (not the spaces between them), select **Individual words**.

- **Overline color** – select the color for the overlining. **Automatic** matches the font color.

- **Strikethrough** – select a strikethrough style for the selected text.

- **Underlining** – select the underlining style that you want to apply. To apply the underlining to words only (not the spaces between them), select **Individual words**.
