

To enable line numbering for specific paragraphs:

- 1) First disable the feature for the document (as above), then select the paragraphs where you want to add the line numbers.
- 2) Choose **Format > Paragraph**, and then click the Outline & Numbering tab (Figure 57).
- 3) Select **Include this paragraph in line numbering**
- 4) Click **OK**.

Alternatively, you can disable line numbering for specific paragraphs (while leaving most of them enabled) by selecting the paragraphs, choosing **Format > Paragraph**, going to the Outline & Numbering tab, and deselecting **Include this paragraph in line numbering**.

You can also create a paragraph style that includes line numbering, and apply it to the paragraphs that you want to add line numbers to. For example, to number the lines of example code in a document, you will probably want to use a font or indentation that is different from normal text.

To specify the starting line number:

- 1) Click in the paragraph and choose **Format > Paragraph**.
- 2) On the Outline & Numbering tab, make sure **Include this paragraph in line numbering** is selected.
- 3) Select **Restart at this paragraph** and enter a line number in the **Start with** box.
- 4) Click **OK**.
