

1 Line numbering

- 2 Line numbering puts line numbers in the margin.
- 3 Figure 1 shows an example with line numbers.
- 4 Click **Tools > Line Numbering** and select the
- 5 Line Numbering dialog (Figure 2). Then click
- 6 You can choose how many lines are numbered,
- 7 numbering type, and whether numbers restart every new page.

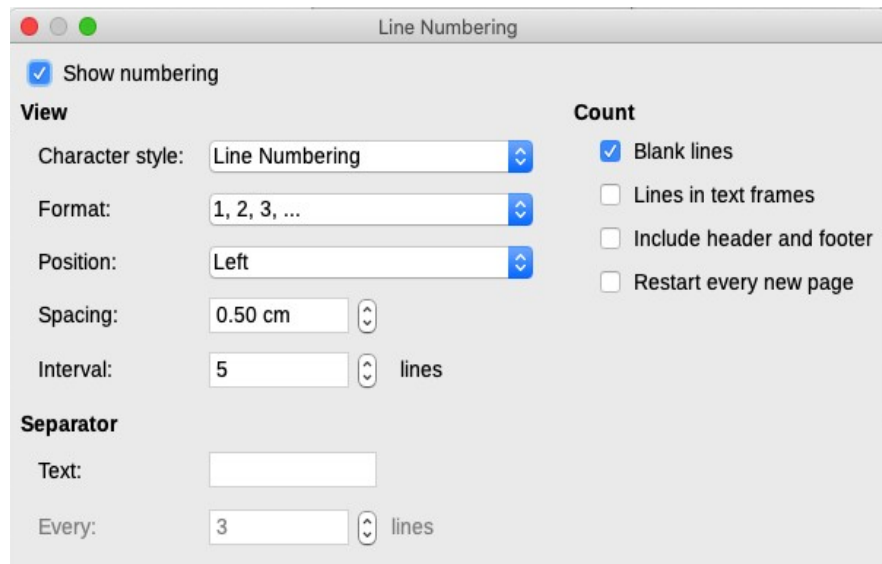

Figure 57: Line Numbering dialog

To disable line numbering for the entire document, you can edit the *Default Style* paragraph style (because all paragraph styles are based on the Default Style):

- 1) In the Sidebar, go to the **Styles pane** and click the **Paragraph Styles** icon.
- 2) *Right-click* the *Default Style* paragraph style and choose **Modify**.
- 3) Click the **Outline & Numbering** tab (see Figure 58).
- 4) In the *Line Numbering* area, clear the **Include this paragraph in line numbering** box.
- 5) Click **OK**.
