

Customizing the Tabbed user interface

As mentioned in “Selecting the user interface” on page 434, one of the choices is *Tabbed*. In this mode, the area at the top of the workspace is divided into tabs, where each tab displays a set of icons grouped by context. The context can change depending on the object selected in the document, for example a table or an image.

Use the checkboxes on the *Notebookbar* tab of the *Customize* dialog (Figure 459) to show and hide the individual options on the various tabs that are provided in the *Tabbed* mode user interface.

Figure 459: The Notebookbar tab of the Customize dialog

Use the **Reset** button to reset the *Tabbed* mode of the notebook bar configuration to the default settings.

✓ Note

LibreOffice has three notebook bar modes that can be selected through the **View > User Interface** dialog – *Tabbed*, *Tabbed Compact*, and *Groupedbar Compact*. However, only the *Tabbed* mode can be modified.
