

Figure 160: EPUB Export dialog

The EPUB Export dialog has the following fields:

#### Version

Choose the EPUB version for the exported file. Values are EPUB 2.0 and EPUB 3.0.

#### Split method

Select the method to start a new section. Choose **Heading** to start the section on a heading, according to the document's chapter numbering. Choose **Page break** to start the section on a page break.

#### Layout method

Choose **Reflowable** to have the ebook display change to fit the screen size and the user's preference (so page size and header/footer content is not exported). Choose **Fixed** to have the ebook layout remain the same under all conditions.

#### Customize - Cover image

The path to the image file for the cover page. If no image is specified, the EPUB file will automatically use any image with a name like cover.gif, cover.jpg, cover.png, or cover.svg. A custom cover image is embedded in the EPUB file.

#### Customize - Media directory

The path to the optional directory for the cover image, metadata, and multimedia files. If you do not specify a directory, the exporter looks for custom media and custom metadata in the current document directory inside a folder with the same name as the document file name.

#### Metadata

The basic information for the file that provides tags to help searches. These fields provide another chance to edit metadata that is picked up by default from **File > Properties** in Writer.
