

Figure 33: Modifying a paragraph style

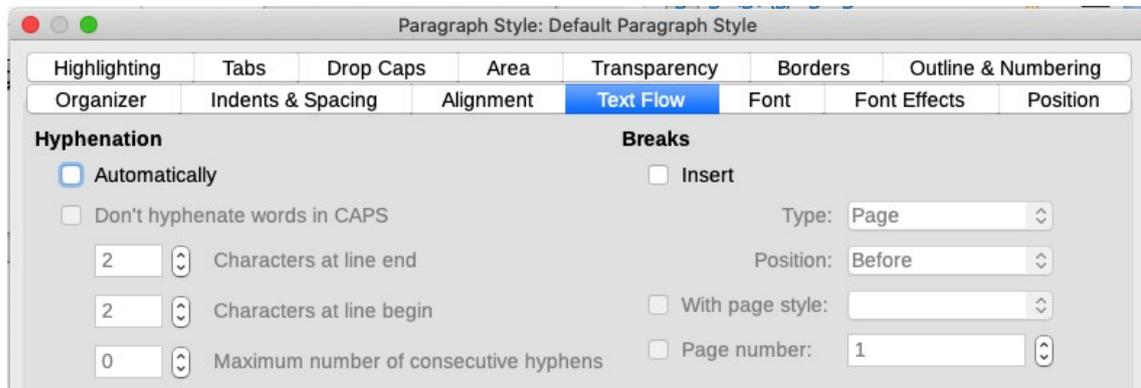

Figure 34: Turning on automatic hyphenation

### ✓ Note

Turning on hyphenation for the *Default Style* paragraph style affects all other paragraph styles that are based on *Default Style*. You can individually change other styles so that hyphenation is not active; for example, you might not want headings to be hyphenated. Any styles that are not based on *Default Style* are not affected. For more on paragraph styles, see Chapters 8 and 9 in this book.

You can set hyphenation settings in **Tools > Options > Language Settings > Writing Aids**. These choices apply when there is no specific setting in a paragraph style. Hyphenation options set in **Writing Aids** are effective only if hyphenation is turned on through paragraph styles.

In *Options*, near the bottom of the dialog, scroll down to find the hyphenation settings.

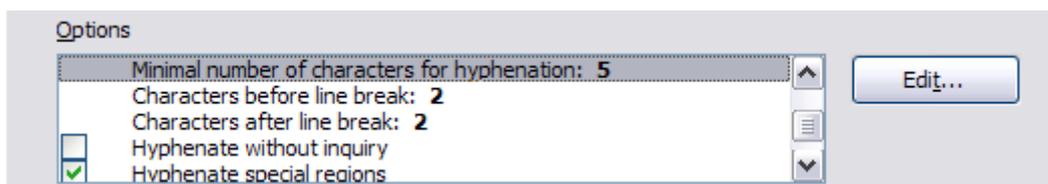

Figure 35: Setting hyphenation options

To change the minimum number of characters for hyphenation, or the minimum number of characters before or after a line break, select the item, and then click the **Edit** button in the Options section.

#### Hyphenate without inquiry

Specifies that you will never be asked to manually hyphenate words that the hyphenation dictionary does not recognize. If this box is not selected, when a word is not recognized, a dialog will open where you can manually enter hyphens.

#### Hyphenate special regions

Specifies that hyphenation will also be carried out in footnotes, headers, and footers.
