

Inserting en and em dashes

To enter *en* and *em* dashes as you type, you can use the *Replace dashes* option on the Options page under **Tools > AutoCorrect > AutoCorrect Options**. This option replaces two hyphens, under certain conditions, with the corresponding dash.

- is an en-dash; that is, a dash the width of the letter “n” in the font you are using. Type at least one character, a space, one or two hyphens, another space, and at least one more letter. The one or two hyphens will be replaced by an en-dash.
- is an em-dash; that is, a dash the width of the letter “m” in the font you are using. Type at least one character, two hyphens, and at least one more character. The two hyphens will be replaced by an em-dash. Exception: if the characters are numbers, as in a date or time range, the two hyphens are replaced by an en-dash.

In Table 3, the A and B represent text consisting of letters A to Z or digits 0 to 9.

Table 3: Inserting dashes

Text that you type	Result
A - B (A, space, hyphen, space, B)	A – B (A, space, en dash, space, B)
A -- B (A, space, hyphen, hyphen, space, B)	A – B (A, space, en dash, space, B)
A--B (A, hyphen, hyphen, B)	A—B (A, em dash, B)
1--2 (number, hyphen, hyphen, number)	1–2 (number, en dash, number)
A-B (A, hyphen, B)	A-B (unchanged)
A -B (A, space, hyphen, B)	A -B (unchanged)
A --B (A, space, hyphen, hyphen, B)	A –B (A, space, en dash, B)

Another means of inserting en and em dashes is through the **Insert > Special Characters** menu. Select the **U+2013** or **U+2014** character (found in the *General punctuation* subset), respectively.

A third method uses keyboard shortcuts. These shortcuts vary depending on your operating system, as described below.

Tip

You can also record macros to insert en and em dashes and assign those macros to unused key combinations, for example *Ctrl+Shift+N* and *Ctrl+Shift+M*. For more information about key combinations, see Chapter 20, *Customizing Writer*.

macOS

For an en dash, hold down the *Option (Alt)* key and type a hyphen. For an em dash, the combination is *Shift+Option+Hyphen*.

Windows

On most non-Asian installations of Windows, hold down the left *Alt* key and type on the numeric keypad: 0150 for an en dash or 0151 for an em dash. The dash appears when you release the *Alt* key.

Tip

On a keyboard with no numeric keypad, use a *Fn (Function)* key combination to type the numbers. (The *Fn* key is usually to the right of the left-hand *Ctrl* key on the keyboard.) For example, on a US keyboard layout, the combination for an en dash should be *Alt+Fn+mjim* and for an em dash it should be *Alt+Fn+mjjj*.
