Display Fields – Hidden text
Display text that is hidden by Conditional Text or Hidden Text fields.

Display Fields – Hidden paragraphs
Display paragraphs that contain a Hidden Paragraph field. This option has the same function as the menu command **View > Field Hidden Paragraphs**.

Display tracked changes
Tracked deletions in margin: By default, deletions are shown in the text with a ~~strikethrough~~ font. To show deletions in the margin, not in the text, select this option.

Tooltips on tracked changes: When this option is selected, hold the mouse pointer over a tracked change to show the type of change, the author, date, and time of day for the change. To hide these tooltips, deselect this option.

Outline mode
If you have activated experimental features, an option (**Show outline content visibility button**) is available under this heading. See "Using experimental features" on page 445.

The other options should be self-explanatory. If not, please refer to the Help.

Figure 439: Choosing default View options for Writer

Formatting Aids options

On the *LibreOffice Writer – Formatting Aids* page (Figure 440), select the desired options.

Layout Assistance – Math baseline alignment
To set the default vertical alignment for formula (Math) objects to use the text base line as a reference, select this option. To enable changing the vertical positioning of objects, deselect this option; you can then set the position for individual objects. See the *Math Guide* for more information.

Display Formatting
The *Display Formatting* options determine which symbols show when you select **View > Formatting Marks** on the Menu bar or the **Formatting Marks** icon on the Standard toolbar. Symbols such as paragraph ends and tabs can help in writing, editing, and page layout. For example, they can show if there are any blank paragraphs or if any tables or graphics are too wide and intrude into the margins of the page.
