3) On the *Organizer* tab of the Page Style dialog (Figure 134), make sure **Next Style** is set to Landscape (to allow for having more than one sequential landscape page).

Figure 134: Set the next page style to Landscape

4) On the *Page* tab of the Page Style dialog (Figure 135), make sure **Orientation** is set to **Landscape**. Change the margins so that they correspond with the margins of the portrait page. That is, the portrait top margin becomes the landscape left margin, and so on.

5) Click **OK** to save the changes.

Inserting a landscape page into a portrait document

Now that you have defined the Landscape page style, here is how to apply it:

1) Position the cursor in the paragraph or table at the start of the page that is to be set to landscape. Right-click and choose **Paragraph > Paragraph** or **Table Properties**, respectively, in the context menu.

2) On the *Text Flow* page of the Paragraph dialog (Figure 136) or the Table Properties dialog (Figure 137), select **Insert** (or **Break** for a table) and **With Page Style**. Set the Page Style property to Landscape. Click **OK** to apply the new page style.

3) Position the cursor in the paragraph or table where the page is to return to portrait orientation and change the paragraph properties or table properties so that **With Page Style** is the portrait page style that was used before the Landscape page style. Click **OK** to return to the portrait page style.
